

## TRADE-IN POLICY

Considering the changes in science and computers, it is possible to trade-in from an older device to a newer device. Here is a guideline to follow if you wish to trade-in your device.

1. Contact your local Sales Representatives and inform them of your interest. They can tell you more about their policies and assistance in the trade-in procedure.
2. Your older device must be returned (we accept a trackable shipping number as confirmation) to the Budapest Home Office **after** we will release a new device to you. If you have constant communication with your Sales Representatives and they in turn are in constant communication with Edit Barota, Supervisor of Trade-ins at the Budapest Home Office, then the turn-around time can be reduced to just a few days.
3. The price to trade-in an older device is as follows:
  - a. The trade in value of a Serial operative SCIO device is 2,500 EUR
  - b. The trade in value of a QXCI device is 1,000 EUR
4. After the funds have been received, we are able to send your trade-in to you.
5. A Trade-in must be completed online by Sales Representatives. Please contact your Sales Representative to begin this process.

If you have further questions, please contact your Sales Representative.

**Please note:**

Until your old device is not received by our office, your account will be set to credit activation for 100 startups. In case the 100 startups were used, the software will be blocked until the old device is returned to our office.
